Avant-propos

Ce cahier prépare au tracé des lettres et des chiffres. Il précède donc le *Cahier d'écriture* (paru dans la même collection) et peut être utilisé à partir de 5 ans, voire plus tôt dans le cas d'enfants précoces et demandeurs.

Il développe les motifs présentés au début du *Cahier d'écriture et* les enrichit d'autres préparant à la graphie des chiffres.

Il s'agit d'habituer dès le départ l'enfant à maîtriser des mouvements qui lui permettront non seulement de tracer correctement les lettres mais encore de les assembler sans problème dans l'écriture des mots.

Sur chaque page, les points de départ et les flèches indiqueront comment réaliser le motif. La taille des lignes diminue jusqu'au bas de la page.

Conseils d'utilisation

• L'écriture de notre langue s'effectuant de gauche à droite sur la ligne, elle réclame l'utilisation de la main droite. Cette main, en effet, précède ce qu'on écrit et l'œil peut en permanence vérifier ce que la main trace. Aussi, à l'exception des enfants

qui sont gauchers véritables (un faible pourcentage de la population), vaudra-t-il mieux éduquer le plus tôt possible les doigts de cette main.

• Tenue du stylo ou du crayon : entre le pouce, l'index et le majeur. Le pouce à gauche, la dernière phalange du majeur sous le stylo et le bout de l'index dessus.

• Délier les doigts par des exercices d'allongement et de repli de ces trois doigts, lesquels doivent pousser la pointe du stylo vers l'avant ou la ramener vers l'arrière.
